Mr. E. H. Allen is the only gentleman whose mame appears on both tickets, and, whichever exposition building, and was impressed with the many advantages of the one being constructed here. One of the significant things about the Expo-

sition is the high prices offered for the privileges and concessions. Manager Ryckman says \$10,000 has been offered for the cafe. The lemonade privilege sold this morning for \$1,000. The privilege of stamping and plating medals of the Exposition sold for \$250. Several offers have been received for the restaurant, but no action upon them has been taken as yet. The stonework for the foundation of the great building commenced to-day, and a large force of masons has been set to work on the north end. Mr.W. B. Knight, chief engineer of the Belt Line railway, will make his report to General Manager Nettleton to-morrow regarding the feasibility of running a track into the exposition grounds, and if favorable, the track will be laid without delay. The prospectus of the exposition is still in the printer's hands, but it is expected that by the latter part of the week a large supply of documents will be ready, and a force of clerks will then be employed to mail them to every large manufacturer in the country. them to every large manufacturer in the country Professor Charles E. Hall, superintendent of the department of natural products, leaves to-mor-row morning on a canvassing tour of Missouri and will visit every town of consequence to communicate with the citizens regarding the proper display of the products of their section. A number of teachers in the public schools have interested themselves in the educational department, their special object being to have the Kansas City school system thoroughly illustrated. They will secure the best specimens of the work of pupils and have them displayed with the new control of the secure that the secure the secure that the secure the secure that the secur with the name, grade and school attached. Manager Ryckman has urged them to go further and exhibit models of some of the leading schools showing the construction, ventilation, sanitation and other important points.

The Bank of Commerce is the oldest bank in Kansas City, having been established in 1865 W. S. Woods is president, L. F. Wilson vice-president, and C. J. White cashier. Among the irectors, in addition to the officers are William A. Wilson, wholesale dealer in teas and cigars; Web Withers, of Vaughn & Co., grain commission; E. L. Martin, J. M.Nave, of McCord, Nave & Co.; William Askew, James Anderson and J. C. Egelhoff. By its last statement, issued on May 14, it possessed a surplus of \$218,553.12-and density of \$41.347,006.22 and deposits of \$4,347,006.22.

The Missouri river has attained a height of 12.7 feet above low water mark and has been rapidly rising since daybreak. It fell a little last night, registering at 7:30 o'clock, 12.4 feet, and remained at that point until this morning. There will be no future fall of the river below the twelve foot mark, the river men think, until the June rise is over. At all the points up the river with the exception of Leavenworth, a slow rise is reported.

The proposed method of drawing the city dumps out into the river and dumping the rubbish into the deepest portion of the channel, has been changed. The dump boats will be hauled near the levee at the foot of Delaware street and large extension platforms will be built around the boat. As the city has made a twenty foot fill at this point it will bring the boats nearly out to the swiftest portion of the current. The dumpers will dump their load ou shoveled into a chute which will project th rubbish a great distance into the current. This change in the method of dumping will be a great to haul out the boats.

The Property in Missouri, the Testator in New York, Which Law Governs? A very interesting will case was argued before Judge Gill, yesterday. Richard Steel, a citizen of New York, dying left real estate in Kansas City, on the corner of Ninth and Central streets, valued at \$25,000. He had a number of children but left his property, amoun ing to several millions, to his wife Frances Steel There is a statute in this state which provides. in the case of a man dying and leaving a will in which he bequeaths his children nothing, the will is regarded as invalid and as far as it affects to have died intestate. In his argument, terday, Judge Brumback said that Mr. Steel be-ing a resident of New York City, the laws of the state of Missouri had no bearing upon the property he owned in this city. Mr. Holmes argue that real property was always governed by the laws of the state in which it was situated, no matter where the proprietor lived or how he came into possession. Judge Gill took the case

under advisement. Officers Elected.

The directors of the Argentine Real Estate, Investment and Loan company held meeting yesterday afternoon and elected the following officers: President, George Sheidley: treasurer, W. J. Anderson; secretary, W. I. Powell. The capital stock of the company i \$500,000, over \$300,000 of which has been paid up. The secretary received word from Boston this morning that the Burton Stock Car compa-ny had let the contracts for its works at Argentine and were ready to begin work.

IS AS TRUE NOW AS IN THE DAYS OF YORE.

Far-seeing Capitalists, Speculators and Investors are looking southward for investments. They see in the near future shadows of coming events, that will make South Side property fairly jump in value.

It is known by every one fa-

miliar with prices, that property on the South Side is far below its real value and much lower than property in any other direction. It seems until recently that the wonderful natural advantages of the South have been overlooked, but within the past few weeks great improvements have been begun, and now all eyes are turned Southward. One Dummy Line is already completed, another is fast nearing completion, and two others are a certainty of the immediate future; affording ample, quick and cheap transportation to this beautiful residence suburb of the future great Metropolis of the Southwest. Beautified by the hand of nature, and rendered accessible by the aid of capital, the high lands South of the city are destined to become the favorable residence portion with beautiful homes, ornamented with lovely lawns and pretty parks, where the purest breezes of Heaven may be enjoyed, and the dust and dirt of the busy city will be unknown, this part of the city will be reached by broad avenues and drives, that cannot be had in any other direction. These are advantages that no other part of the city possess,

TROOST AVENUE

and cannot be overlooked.

is now admitted by all to be the future great residence street, the

EUCLID AVENUE of Kansas City. Of the many beautiful additions on Troost avenue, there is none as high, beautiful and attractive as

TROOST PLATEAU.

It is all its name implies—a high, level ridge—on the summit of which you have a view of the city, Independence, Westport, and the surrounding country as far as the eye can reach. You will be surprised and delighted when you stand on Troost Plateau, and see the panoramic view of the city and suburbs. It is worth a visit and the view you can obtain will repay you for the drive to see it. The Investor well knows it is safe as an investment, the Speculator will see in it quick returns, and the Home Seeker will be delighted with the location and prices, and will be pleased with the "Acme" addition of Kansas City.

Remember this addition will sell rapidly, and it cannot be duplicated, there is none other like

PHENOMENAL SUCCESS!

We have had in the sale of Lots in this Addition. Because they are easy to seil.

Low Prices and Easy Terms sell them.

The Motor Line sells them.

They sell themselves.

We platted this addition to sell.

We have not been disappointed.

We graded the streets, put a neat fence around every block, gave a lot to the Kansas City, Independence & Park Motor Line. Co. on which to build a depot.

We have advertised the property well and expect to continue advertising it until every lot is sold.

THERE IS A GREAT DEAL IN BUYING A LOT IN AN ADDITION THAT IS WELL ADVERTISED. It will help you to sell. Everybody will know where it is. There are dozens of additions in and around Kansas City you have never heard of. But nearly everybody has either heard of or read of

STREETS ALL GRADED!

Its advantages are not derived from being located near a proposed dummy or cable line, nor by being situated near some beautiful suburban town. But its value is based on the fact that it is but one and one-quarter miles from the center of the city, a distance equal to that between Main street and Woodland avenue, where similar ground is selling at \$100 to \$150 per foot.

It fronts on a 100-foot Boulevard, now being paved; is passed every five minutes by street car running to junction of Ninth and Main. It is but twenty minutes' walk from center of the city. You can get there from our office by car in ten minutes.
